Pipeline **2km** Corridor selection ➡ **100m** Corridor ➡ **30m** corridor

| Pre-Project | Studies Execution | Detailed engineering, procurement, early works, legal & commercial frameworks | Final Investment Decison (FID) | Construction | First Oil |
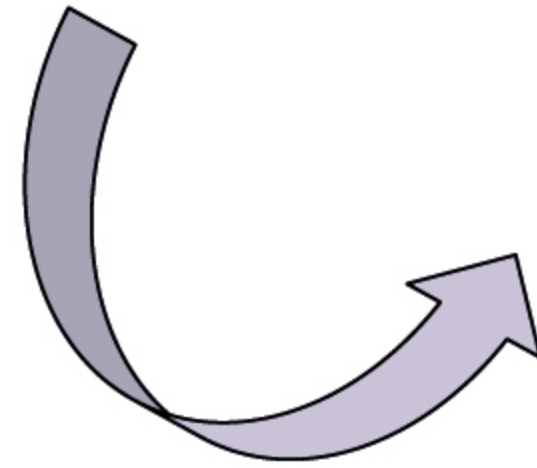

ESIA: Environmental and Social Impact Assessment

- Evaluate the potential environmental and social (including human rights) risks and opportunities
- A legal requirement for approval of the project
- Design measures to avoid, mitigate and manage negative impacts
- Identify and enhance the positive impacts

Geophysical and Geotechnical Surveys

> thorough and comprehensive site investigation for design and construction

FEED: Front End Engineering Design

> focuses the technical requirements as well as rough investment cost for the project
