Purpose and scope of assignment.

Electrical and Instrumentation Supervisor is responsible for supervising and coordinating a team of Electricians and ensure the successful completion of projects assignments. This position requires a keen eye for detail, a commitment to safety, and the ability to lead and motivate a team to complete projects assignments on time and within budget.

Job responsibilities

- Preparing and assigning work schedules.
- Supervising and motivating team members.
- Ensuring proper handling and maintenance of electrical and instrumentation equipment.
- Maintaining safety standards and adhering to electrical and instrumentation codes.
- Providing help in installing electrical and instrumentation equipment like panel boards, enclosures, cable tray, cable pulling, cable termination, earthing system, lighting system or any other electrical and instrumentation systems.
- Troubleshooting and repairing electrical and instrumentation issues/malfunctioning as and when required.
- Reviewing work procedures and suggesting improvement measures.
- Monitoring and handling inventory purchases.

- Estimating and preparing budgets.
- Documenting all inventory purchases.
- Hiring, training, and evaluating performances of new employees.
- Coordinating with on-site personnel like electricians, contractors, and architects to ensure proper workflow.
- Supervising on-site electrical and instrumentation operations and reporting any major issues to the management.
- Conducting labor and material estimates.
- Inspecting and interpreting any remodeling projects.
- Providing moral and technical support when needed.

Job Qualification, Experience and Skills

- Degree or Diploma in Electrical Engineering or a related field.
- Proven work experience in the Electrical and Instrumentation department or any construction company.
- Familiarity with the electrical and instrumentation system, tools, and equipment.
- Basic computer skills.
- Strong communication and interpersonal skills.
- Displaying leadership qualities.
- An eye for detail and the ability to troubleshoot issues.
- Knowledge of safety and industry standards.
- Highly motivated.
- Analytical and decision-making skills.
- Possessing sound technical knowledge.
- Ability to maintain a clean and safe working environment.
- Ability to work collaboratively with other technical departments.
- Ability to work at long hours and in extreme weather conditions.
