

PROJECT BRIEF

DATE: 17th JANUARY 2025

PLACE: KYAMBOGO UNIVERSITY

East African Crude Oil Pipeline (EACOP) Ltd. signs an MoU with KYAMBOGO University to support implementation of National Content Initiatives.

EACOP has today signed a Memorandum of Understanding (MoU) with Kyambogo University on behalf of its contractors and suppliers. The MoU will provide a framework to guide collaboration between the two parties towards the realization of the National Content Capacity Building initiatives.

The East African Crude Oil Pipeline (EACOP) Ltd. is a project company set up to develop, build and operate a pipeline system which will transport crude oil from Kabaale in Uganda to the port of Tanga in Tanzania. Given the nature of the project, there are several national and international contractors and suppliers who will support different aspects/scopes on the construction of the pipeline and others who will also supply bespoke equipment for the pipeline. To promote National Content, all EACOP's tier one contractors and suppliers have made commitments to work with EACOP to support knowledge and build capacity among Ugandan recent graduates, technicians and instructors, professors, and lecturers from tertiary and vocational training institutions. These commitments will be realized through the implementation of two key Capacity Building initiatives, namely:

1. **Internship/ Graduate Training programs:** These trainees will be graduates or existing students from the institution and will be offered training and work exposure with EACOP's suppliers and contractors on various scopes of the project according to their disciplines. The duration and location of the internships varies between the different contractors/suppliers.

East African Crude Oil Pipeline (EACOP) Ltd

2. **Train the Trainer programs:** These training sessions will be delivered by EACOP's contractors and suppliers and will seek to share knowledge on their different scopes of work on the project as they relate to various engineering disciplines and vocational skills.

To date, EACOP has signed MoUs with UPIK and Makerere, as well as with professional bodies such as the Institute of Surveyors of Uganda to support the onboarding of graduate trainees with our contractors/suppliers and of interns with EACOP's internal departments.

To date, 128 graduate trainees in Uganda and Tanzania have benefited from bespoke trainings, exposure and on-job- experience through the graduate training program scheme and 13 Train the Trainer sessions have been held either virtually or in-person by EACOP and its contractors.

- THE END -

The East African Crude Oil Pipeline is a 1,443km crude oil export infrastructure that will transport Uganda's crude oil from Kabaale - Hoima in Uganda to the Chongoleani peninsula near Tanga in Tanzania for export to the international market. This major export system includes 1,443 km (296 km in Uganda and 1147km in Tanzania) of insulated and buried 24" inch pipeline, 6 pumping stations, two pressure reduction stations and a marine export terminal in Tanzania.

Following the Final Investment Decision (FID) that was taken on the 1st of February 2022, East African Crude Oil Pipeline (EACOP) Ltd. on 15th February concluded the formation of the company that will construct and operate the pipeline.

EACOP Ltd. is a special purpose company, governed by its Shareholders Agreement in which TotalEnergies (62%), Uganda National Oil Company (UNOC - 15%), Tanzania Petroleum Development Corporation (TPDC - 15%) and CNOOC (8%) are shareholders.
